

STUDENT STORY

Julie

Area of study:

Bachelor of Nursing

Why did you choose your field of study?

I am currently an endorsed enrolled nurse and I'm wanting to further my career and push myself more.

How important has CUC Bass Coast been to your studies? How have you benefited from the Centre's services?

Using the computers in a quiet area independently but also being able to communicate with group projects with everything available has been amazing and assisting in achieving good marks. The use of the printer when I run out of ink at home, has been a blessing for a visual learner. I have liked attending the lunches and also creating the mindfulness projects set out by the centre.

How do you plan to apply your knowledge and skills after graduation?

I'm hoping to get into a specialised area of nursing and branch away from my comfort zone of subacute nursing.

Share with us some of your proudest moments as a student.

Definitely receiving high distinctions for 3 out of my 4 subjects.

Please share any insights you have gained along your learning journey.

Always take the time for yourself, make sure you are set with everything you need and take breaks regularly.
