

STUDENT STORY

Paige

Area of study:

Bachelor of Education (Primary)

Why did you choose your field of study?

I wanted to be able to support children in growing and building a positive relationship with school.

How important has CUC Bass Coast been to your studies? How have you benefited from the Centre's services?

The CUC has been one of the main supports I've had during my studies. Having Bec (Learning Skills Advisor) as support during my assignments as well as Sibby (Centre Support Officer) and Andrea's (Centre Manager) support throughout all aspects of my studying journey has been a vital part of making studying accessible for me.

How do you plan to apply your knowledge and skills after graduation?

I am hoping to work in a children's hospital as a teacher for long term inpatients where I have an opportunity to support children in their learning to be able to continue their learning even in harder times while also allowing them to build a support network and have a small sense of 'normality' in times where they don't have much of it.

Share with us some of your proudest moments as a student.

1. Building study skills that are transferable to all aspects of my life.
2. Continuing and passing my subject at times even when I was uncertain it was possible.
3. Being a part of a supportive network of students where we are able to build each other up.

Please share any insights you have gained along your learning journey.

That marks are not always reflective of your abilities or commitment and it's okay to feel that submitting an assignment is an achievement whether it's a pass grade or a 90%.
