

STUDENT STORY

Patrishia

Area of study:

Masters of Teaching (Secondary) – 2023

Why did you choose your field of study?

Even from an early age I have always wanted to become a teacher. This dream was put on hold to follow my passion of food and raise my family which inevitably lead me back to teaching.

How important has CUC Bass Coast been to your studies? How have you benefited from the Centre's services?

My journey would not be possible without the support of the team at the Bass Coast CUC. They helped when it looked like I would have to pause study due to financial pressures by alerting me to possible scholarships and a mentor that would allow me to continue my learning journey. This meant I was the extremely lucky participant of the E.D. Daniel Scholarship and I am forever grateful for the opportunity to continue my learning journey.

There have been many occasions where I have needed the assistance of the learning skills advisor for assurance and direction and always felt welcomed to ask any questions that I needed answered. Having the space to study in a quiet, safe and supportive environment has been the key to my successful learning journey.

No matter how small or large the problem the team at CUC Bass Coast are always there to support their members along their journey. From the bottom of my heart, thank you.

How do you plan to apply your knowledge and skills after graduation?

I still have two weeks to go until I graduate but thanks to the CUC team and all their support I already have an amazing job at Bass Coast College that starts in January.

Share with us some of your proudest moments as a student.

Achieving to a high standard even when I thought my work was not good enough.

Please share any insights you have gained along your learning journey.

The support is there all you have to do is reach out.
