

# STUDENT STORY

## Robyn

### Area of study:

Diploma of Business and  
Human Resource Management

### Why did you choose your field of study?

To enhance my knowledge for my current role. The new knowledge and skills I am learning will help me grow in my role along with the business needs. I also wanted to show my children that we are always learning in life.

### How important has CUC Bass Coast been to your studies? How have you benefited from the Centre's services?

Crucial! I have 3 children with additional needs at home so quiet study time is not possible there! CUC gives the space I need to concentrate without interruptions, providing a quiet sanctuary away from home to concentrate and study in. Always a smiling face to be greet you.

### What kind of work are you currently doing and how do you typically spend your free time?

I'm an office manager at a local engineering firm and LOVE it. In my free time I enjoy tennis, gardening, taxi service for my children. I enjoy a good book and glass of wine whilst camping.

### Share with us some of your proudest moments as a student.

I am 46, have 3 kids, work part time and have managed to go back to studying! It's a juggle but something I am proud of.

### Please share any insights you have gained along your learning journey.

You must commit time each week for study. Don't study late at night.
